

Ridge Rack System

by Ridge Runner Gear, LLC

RUN THE RIDGE

(and don't forget your smart phone)

Operator's Guide: Because your gear deserves a rest too.

Product Name: Ridge Rack **Brand:** Ridge Runner Gear (RRG)

Model Number: RRS

Weight: 2.3 oz (About the same as two good bites of beef jerky.)

Dimensions: 6.9" L x 7.9" W x 10.2" H (Shorter than the fish you 'threw back.)

Materials: ASA, stainless steel (Made for fishin', not for quittin'.)

What Is This Magnificent Piece of Mountain Engineering?

Meet the **Ridge Rack System**—the adjustable, modular, clamp-on gadget holder built for folks who believe gear should earn its keep. Clamp it to a chair, hammock ridgeline, kayak, tent pole, camp table, trekking pole, tree branch, lawn chair, fishing chair, or that mysterious pipe sticking out of the ground at the campsite (use common sense on that last one). With the right attachments, your **Ridge Rack** can hold phones, fans, lanterns, snacks, and whatever other essential camp gadgets you can't seem to live without. In short, **it's a third hand that doesn't complain.**

NOTICE: Reading this manual first is quicker than chasing your cup across the campsite, cheaper than replacing a busted phone screen and far less embarrassing than explainin' how you tipped over tryin' to balance your gear in your lap. Think of it as sittin' pretty with know-how before sittin' pretty with your **Ridge Rack**.

Why the Ridge Rack is Smarter Than Your Average Mount

Field Manual Spec	Civilian Translation
Adaptive Mounting Architecture – Secures to chairs, poles, ridgelines, tables, and other compatible structures.	Mounts darn near anywhere – If it fits, upright, and not actively running away, the Ridge Rack can probably clamp to it.
Modular Accessory Interface – Accepts multiple attachment configurations for changing mission requirements.	One rack, many jobs – Today it's a phone holder. Tomorrow it's a iPad holder. Next week it'll probably surprise you.
Rapid Configuration Capability – Accessories can be added, removed, or repositioned in seconds.	Changes faster than camp plans – Which usually change the moment rain shows up.
Compact Transport Profile – Packs efficiently without sacrificing functionality.	Small enough to pack, useful enough to bring – Unlike that "essential" camp gadget you never use.
Rapid Release Trigger – One-touch design for lightning-fast reel removal.	Snag-free speed – Faster than a cat spotting the can opener.
Precision Angle Adjustment – Multiple positioning options allow customized gear placement.	Put stuff exactly where you want it – Not where gravity thinks it belongs.
Environmental Resistance Package – Designed for outdoor use in varying weather conditions.	Likes the outdoors as much as you do – Sun, rain, dust, and campfire smoke don't scare it.

About Ridge Runner Gear

At Ridge Runner Gear, we believe you shouldn't have to choose between comfort and capability. Our gear is meticulously engineered for those who seek the serenity of the wilderness without sacrificing the sophistication of well-designed essentials. Whether you're setting up a base camp beneath alpine stars or trekking toward your next breathtaking vista, our products deliver premium performance with minimalist weight. Because luxury isn't about excess—it's about excellence, wherever the trail leads.

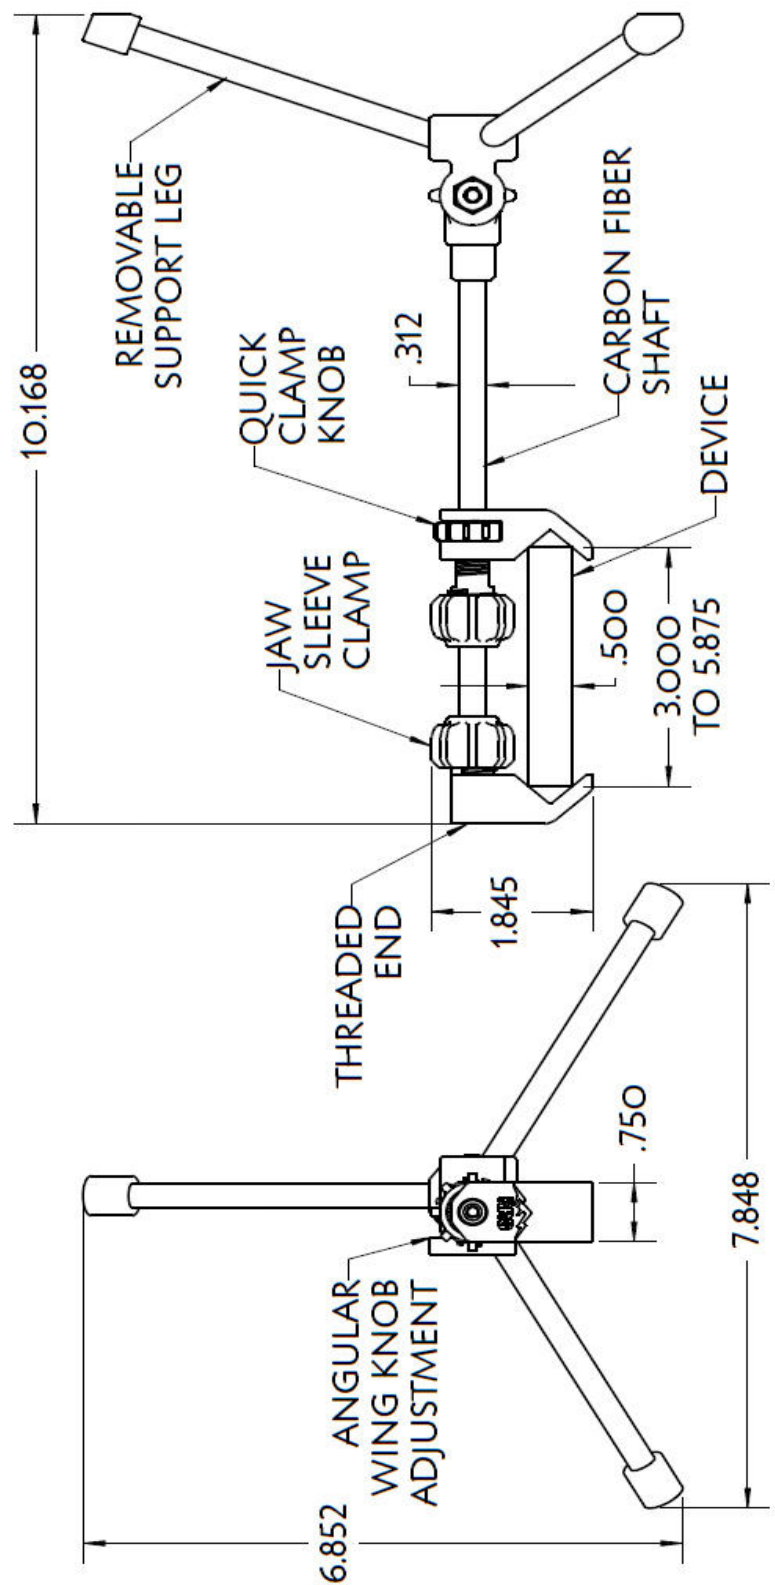

We are a faith-based company, guided by Christian values in everything we do—from the way we design our gear to how we serve our customers. We believe the outdoors is one of God's greatest gifts, and we're passionate about helping others enjoy it responsibly and respectfully. That's why we practice Leave No Trace principles and strive to be good stewards of the wild places we love.

Proudly American Made, our gear is built with rugged durability and refined utility for the serious adventurer.

Thank you for supporting our dream and being part of the Ridge Runner journey. With your support, we get to build gear we love—for adventures you'll never forget.

Dimensions/Identification

THE RIDGE RACK CORE SYSTEM

“Because the best gear isn't the gear you carry the most.

It's the gear that does the most with the least.”

System Overview

The Ridge Rack Core System is the foundation of the entire Ridge Rack family. Every Ridge Rack accessory, mount, and attachment is built around a common modular platform designed to work together, not compete for space in your gear bag.

Instead of carrying separate holders for every activity, the Ridge Rack allows you to swap accessories and mounting brackets in seconds. One core system can support multiple configurations depending on where you are and what you're doing.

Whether you're relaxing at camp, sitting in a folding chair, attending a sporting event, or working in the garage, the Ridge Rack adapts to the environment instead of forcing you to buy a different gadget for every situation.

Think of it as a Swiss Army knife for organizing gear—except bigger, lighter, stronger, and far less likely to disappear into your pocket.

The Ridge Rack Philosophy

Most gear organizers solve one problem.

The Ridge Rack solves dozens.

Rather than creating a separate holder for every possible use, Ridge Runner Gear designed a common platform where accessories can be mixed, matched, upgraded, and rearranged to fit the situation.

The result is:

- ◆ Less weight in your pack
- ◆ Less clutter in your gear room
- ◆ Fewer duplicate products
- ◆ More functionality from every ounce you carry

One system. Multiple environments. Endless excuses to buy more accessories.

Shared Core Interface

Every Ridge Rack accessory uses the same shared attachment interface.

This allows accessories to move between different Ridge Rack models without replacing the entire system.

Today's phone holder can become tomorrow's fan mount.

Today's cup holder can become tomorrow's camp chair accessory.

The goal is simple: **Buy once. Adapt forever.**

Bracket Swapping System

The Ridge Rack uses interchangeable mounting brackets that allow the system to adapt to different environments.

Depending on the configuration, accessories can be moved between:

- ◆ Camp chairs
- ◆ Fishing chairs
- ◆ Tent poles
- ◆ Kayaks
- ◆ Hiking poles
- ◆ Tables
- ◆ Workstations
- ◆ Tailgates
- ◆ Other suitable mounting locations

Changing brackets requires only a few moments and no engineering degree.

If you can operate a wing knob, you're already qualified.

Wing Knob Adjustment System

The Ridge Rack uses wing knobs to make adjustments quick and simple.

The wing knobs allow you to:

- ◆ Change accessory position
- ◆ Adjust arm angles
- ◆ Secure mounting brackets
- ◆ Reconfigure the system in the field

No tools required.

No tiny hardware to lose in the grass.

No colorful language required.

(Although we understand if camping conditions make that difficult.)

Expansion Capability

The Ridge Rack is designed to grow with your needs.

As new Ridge Runner Gear accessories become available, they can be added to the existing Ridge Rack platform without replacing the core system.

Current and future accessories may include:

- ◆ Phone holders
- ◆ Cup holders
- ◆ Lantern holders
- ◆ Fan holders
- ◆ Utility hooks
- ◆ Future Ridge Runner Gear inventions we haven't dreamed up yet

The platform was built with expansion in mind from day one.

Why It Exists

The Ridge Rack was created to solve a problem outdoor enthusiasts know all too well:

Every activity seems to require another holder, another mount, another organizer, and another piece of gear.

Eventually, the accessories start weighing more than the equipment they're supposed to support.

The Ridge Rack takes a different approach.

Reduce Packed Weight

One modular platform replaces multiple dedicated holders.

Eliminate Duplicate Gear

Accessories can move from one environment to another instead of requiring separate versions.

Multi-Environment Functionality

Use the same system while camping, fishing, kayaking, traveling, working, or relaxing around the house.

Fast Adaptation

Change configurations in minutes instead of carrying an entirely different setup.

Because the best gear isn't the gear you carry the most.

It's the gear that does the most with the least.

RIDGE RACK MINIPOD

The Core System Base

The **Ridge Rack Minipod** is the simplest and most versatile way to deploy your **Ridge Rack** system. Designed as a compact tabletop base, the **Minipod** transforms your **Ridge Rack** accessories into a stable, low-profile workstation that works almost anywhere.

Whether you're sitting at a desk, relaxing at camp, working from a picnic table, or watching videos in bed, the **Minipod** provides a secure foundation for your gear without requiring clamps, poles, or mounting hardware.

Think of it as the gateway drug to the **Ridge Rack** ecosystem.

Most folks start with a **Minipod** and quickly discover they suddenly need **Ridge Racks** everywhere.

Tabletop Mode

Set the **Minipod** on any reasonably flat surface and you've got an instant **Ridge Rack** workstation.

Perfect for:

- ◆ Camp tables
- ◆ Picnic tables
- ◆ Tailgates
- ◆ Workbenches
- ◆ Kitchen counters
- ◆ Work desks
- ◆ Anywhere else you need your gear standing at attention

No clamps. No setup drama. No engineering degree required.

Desktop Mode

Turn your desk into a command center by positioning phones, lights, cameras, accessories, and other gear exactly where you want them.

Ideal for:

- ◆ Home offices
- ◆ Workshops
- ◆ Gaming setups
- ◆ Content creation
- ◆ Video conferencing
- ◆ Remote work

Because balancing your phone against a coffee mug is not a professional mounting solution.

Stable Low-Profile Platform

The **Minipod's** low center of gravity provides a stable platform while keeping the footprint compact and light.

This means:

- ◆ Less wobble
- ◆ Less clutter
- ◆ Better visibility
- ◆ More usable space

It stays out of the way while keeping your gear right where you need it.
Just the way good gear should.

Your Entry Point into the Ridge Rack Ecosystem

The Minipod is often the first Ridge Rack component users experience.

Why?

Because it works almost everywhere.

The same accessory that sits on your desk today can mount to a camp chair tomorrow and a tree limb next weekend.

One accessory.

Multiple environments.

Infinite opportunities to say, "Hey, that's actually pretty handy."

Features

Field Manual Spec

Compact Stabilized Deployment Platform

Civilian Translation

Turns your Ridge Rack into a tiny command center.

Common Uses

Desktop Phone Stand

Keep your phone upright, visible, and off the pile of stuff you're pretending to organize.

Camp Table Station

Create a dedicated home for your phone, light, fan, or other accessories while relaxing around camp.

Bedside Companion

Perfect for holding a phone, flashlight, charging cable, or other essentials within reach.

Camp Lighting Platform

Position lanterns and lights exactly where they're needed without hanging them from random tree branches.

Content Viewing

Watch videos, movies, tutorials, or fishing reports without balancing your device against whatever happens to be nearby.

Video Calls

Look slightly more professional than someone holding their phone with one hand while searching for the mute button with the other.

Lightweight Workstation

Build a compact workspace almost anywhere with minimal setup and maximum flexibility.

Tips & Tricks

Build a Mobile Studio

The Minipod makes an excellent base for filming products, tutorials, unboxings, or social media content.

Your followers don't need to know your "professional camera setup" is sitting on a picnic table.

Travel Friendly

Perfect for hotel rooms, airports, travel trays, RVs, and camp tables.

If there's a flat surface nearby, the Minipod is ready to work.

Stay Ready

Many users leave the Minipod attached to their favorite accessory for rapid deployment.

Pull it out, set it down, and you're in business.

Upgrade Anytime

The Minipod is only the beginning. As your **Ridge Rack** collection grows, the same accessories can move between **Minipods**, clamps, kayak mounts, chair mounts, and future **Ridge Rack** platforms.

Your gear evolves with your adventures.

Final Words of Wisdom

A phone balanced against a water bottle is an accident waiting to happen.

A phone mounted on a Minipod is called planning.

Choose wisely.

RIDGE RACK BRACKET SYSTEM

The **Ridge Rack Bracket System** is what transforms the **Ridge Rack** from a simple accessory holder into a fully adaptable gear management platform.

Different adventures call for different mounting methods. That's why **Ridge Runner Gear** designed multiple bracket options that all work with the same **Ridge Rack Core System**.

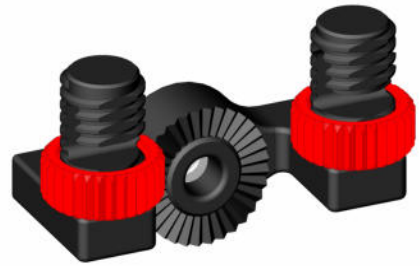

Swap brackets. Keep adventuring.

Single Ridgeline Bracket

Overview

Designed specifically for gathered-end hammocks and standard ridgelines, the **Single Ridgeline Bracket** allows the **Ridge Rack** to hang securely from a single support line while keeping your gear organized and within easy reach.

No more digging through pockets while trying not to fall out of your hammock.

Common Uses

Phone Mounting

Keep your phone visible for navigation, videos, music, weather updates, or pretending you're checking the weather while actually scrolling social media.

Lantern Hanging

Position camp lighting exactly where it's needed.

Fan Mounting

Perfect for those summer nights when Mother Nature forgets to turn on the breeze.

Storage Support

Hang lightweight camp essentials like your baseball cap where they're easy to reach but out of the dirt.

Field Manual Spec

Ridgeline Deployed Equipment Management System

Civilian Translation

Turns your hammock into mission control.

TREE HUB BRACKET

Overview

The Tree Hub Bracket turns a tree into a mounting point for the Ridge Rack System.

Designed for saddle hunters, tree stand hunters, campers, and anyone else who occasionally looks at a tree and thinks, *I could mount something to that*, the Tree Hub provides a solid attachment point for Ridge Rack extension rods and accessories.

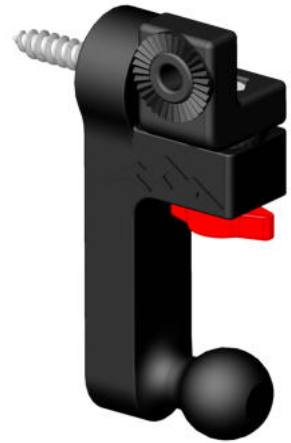

Once mounted, the Tree Hub lets you position phones, cameras, cup holders, fishing gear, lights, and other Ridge Rack accessories exactly where they're useful.

No table.

No shelf.

No problem.

The tree was already there anyway.

Advantage

Tree-Mounted Ridge Rack Support

Provides a dedicated mounting point for attaching the Ridge Rack System directly to a tree.

Flexible Positioning

Use Ridge Rack extension rods and accessories to place your gear where it's easy to see, reach, and use.

Modular Accessory Support

Works with the Ridge Rack ecosystem, allowing you to build the setup that fits what you're doing instead of carrying a dedicated mount for every accessory.

Keeps Gear Organized

Helps move frequently used equipment out of pockets, packs, and the bottom of the tree stand.

Civilian Translation

Turns a tree into a gear rack.

Double Ridgeline Bracket

Overview

Designed specifically for bridge hammocks that utilize dual ridgelines, including systems like the **Dutchware Banyan®**.
My personal favorite way to camp.

By attaching to two support lines instead of one, the Double Ridgeline Bracket provides additional stability and positioning control.

Advantages

Increased Stability

Two attachment points help reduce movement during use.

Reduced Swing

Less bouncing, swaying, and accidental gear gymnastics.

Better Positioning

Keeps accessories exactly where you put them.

Wider Accessory Spacing

Provides additional room for multiple accessories and improved organization while adding more interior room if you use the hammock cover like I do.

Civilian Translation

Less wobble. More chill.

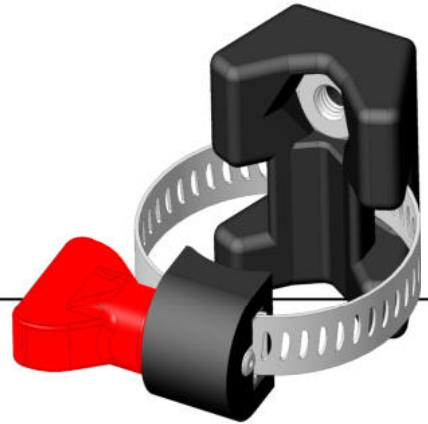

Because your phone shouldn't feel seasick while you're lying still.

Universal Mount Bracket

Overview

The Universal Mount Bracket is the workhorse of the Ridge Rack family.

Its adjustable clamp design allows mounting to a wide variety of structures, making it one of the most versatile components in the entire ecosystem.

Compatible Mounting Locations

- ◆ Camp chairs
- ◆ Fishing chairs
- ◆ Tent poles
- ◆ Shelter poles
- ◆ Kayak rails
- ◆ Workbenches
- ◆ Tailgates
- ◆ Tree branches
- ◆ Deck railings
- ◆ Odd-shaped objects
- ◆ That thing at camp you don't know the name of but it works perfectly

Clamp Range

Compatible with mounting surfaces from:

0.375" to approximately 1.375" in diameter

Add your own longer hose clamp and the possibilities are almost unlimited.

Tips & Tricks

Many users leave the Universal Mount Bracket attached to their favorite chair, kayak, or workstation and simply swap Ridge Rack accessories as needed.

Mount additional brackets for super quick attachments in the future.

Set it once.

Enjoy it often.

Field Manual Spec

Multi-Surface Rapid Deployment Mounting Platform

Civilian Translation

Clamp it to stuff and get on with your day.

Pole / Trekking Pole Bracket

Overview

The Pole Bracket converts the Ridge Rack into a lightweight elevated utility station by utilizing trekking poles, tent poles, or other compatible supports.

When combined with guy lines, it can create a surprisingly capable camp organization system.

Common Uses

Monopod Phone/Camera Mount

Ditch the heavy tripod and use what you already have with you. Use the bottom pole clamp to mount your camera to your trekking pole or use both brackets to mount your phone.

Lantern Stand

Raise camp lighting above eye level for improved illumination.

Water Filtration Hanger

Perfect for gravity filtration systems.

Elevated Camp Utility Point

Hang lightweight gear off the ground and within reach.

Guyed Stabilization Setup

Create a stable free-standing utility station using three guy lines and a trekking pole.

Field Manual Spec

Elevated Field Utility Deployment Platform

Civilian Translation

Turns your trekking pole into camp staff management.

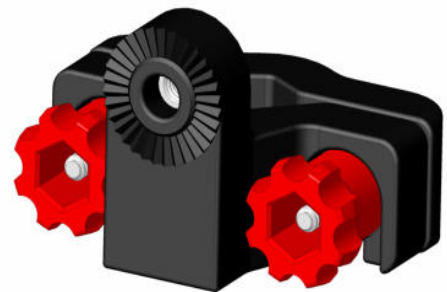

Pole Mount Bracket

Overview

The Pole Mount Bracket is the fast-deployment specialist of the Ridge Rack family. Designed specifically for round poles ranging from **0.500" to 0.812" in diameter**, it provides a lightweight and secure mounting solution for many of the structures outdoor enthusiasts use every day.

While the Universal Mount Bracket is built to handle a wide variety of shapes and sizes, the Pole Mount Bracket focuses on doing one job exceptionally well: mounting quickly to round poles.

If speed matters, this is your bracket.

Common Uses

Tent Pole Organization

Keep lights, phones, and accessories off the ground and within reach.

Camp Chair Mounting

Add Ridge Rack accessories directly to compatible chair frames.

Trekking Pole Utility Station

Convert a trekking pole into a lantern stand, hydration hanger, phone mount, or camp organization point.

Elevated Camp Setup

Create lightweight utility stations throughout camp using existing poles and supports.

Field Manual Spec

Rapid Deployment Pole Interface Platform

Civilian Translation

For people who'd rather spend time relaxing than installing brackets.

RIDGE RACK ACCESSORIES

Accessories are what transform the Ridge Rack from a mounting platform into a complete gear management ecosystem.

Mix. Match. Reconfigure.

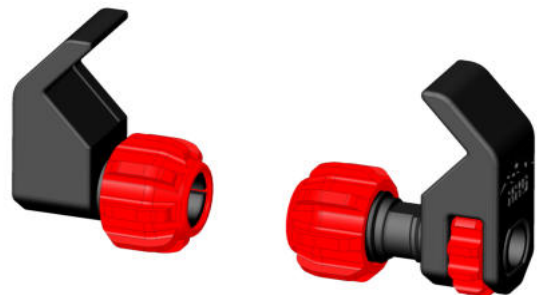

Repeat as necessary.

Gear Clamp Brackets

Overview

The Gear Clamp Brackets transform the Ridge Rack from an accessory holder into a fully adjustable gear support system.

Using a pair of adjustable clamp brackets mounted on carbon fiber shafts, the system provides nearly unlimited positioning flexibility. Each bracket can slide anywhere along the shaft and rotate to virtually any angle, allowing gear to be positioned exactly where it's needed.

Whether you're holding a phone, tablet, small monitor, light, clipboard, map, or camp accessory, the Gear Clamp Brackets adapt to the task.

How It Works

The system uses two independent clamp brackets mounted on carbon fiber support shafts.

Each bracket can:

- ◆ Slide along the length of the shaft
- ◆ Rotate around the shaft
- ◆ Lock into position using the Ridge Rack adjustment system

This allows precise positioning without requiring multiple dedicated mounts.

The result is a highly adaptable platform that can be customized for almost any lightweight

gear.

Quick-Adjust Clamp Bracket

One of the clamp brackets features an additional quick-adjust mechanism that allows gear to be rapidly installed or removed without disturbing the primary setup.

After the initial adjustment is made, the brackets can remain positioned on the shafts, making future setup dramatically faster.

Set it once.

Use it often.

Look like a genius every time.

Clamping Capacity

The Gear Clamp Brackets can securely hold items ranging from:

0.06" to 0.82" thick

Compatible items may include:

- ◆ Phones
- ◆ Tablets
- ◆ iPads
- ◆ Lightweight monitors
- ◆ Maps
- ◆ Clipboards
- ◆ Books
- ◆ Notebooks
- ◆ Solar panels
- ◆ Camp accessories
- ◆ Other lightweight equipment

If it fits between the clamps and isn't outrageously heavy, there's a good chance it can be mounted.

Unlimited Expansion

The width of the system is determined by the length of the carbon fiber shafts.

Need more space?

Add more shafts.

Additional shafts can be added to accommodate larger items such as:

- ◆ iPads and tablets
- ◆ Portable monitors
- ◆ Lightweight display panels
- ◆ Larger organization systems
- ◆ Future Ridge Runner Gear inventions

The Gear Clamp Brackets don't care what you're holding.

They only care where you want it.

Advantages

Infinite Adjustment

Slide anywhere along the shaft and rotate to virtually any angle.

Fast Repeat Setup

Leave the brackets adjusted between uses for rapid deployment.

Lightweight Construction

Carbon fiber shafts provide excellent strength with minimal weight.

Expandable Platform

Support size grows with shaft length.

Multi-Purpose Functionality

One system can replace multiple dedicated holders.

Field Manual Spec

Adaptive Multi-Axis Equipment Retention System

Civilian Translation

Clamp almost anything almost anywhere.

Common Uses

- ◆ iPad mounting

- ◆ Portable monitor support
- ◆ Camp workstation setup
- ◆ Content creation
- ◆ Video calls
- ◆ Digital maps and navigation
- ◆ Reading station
- ◆ Cooking reference display
- ◆ Workshop organization
- ◆ Mobile command center

Final Words of Wisdom

The Gear Clamp Brackets were designed for people who look at a problem and think:

"I bet I can mount that."

Most of the time, they're right.

MAG DOCK

Overview

The Mag Dock is a magnetic phone mounting bracket designed specifically for the Ridge Rack System.

It provides a simple, secure way to mount your phone to a Ridge Rack setup while keeping the screen visible and the phone easy to grab when needed.

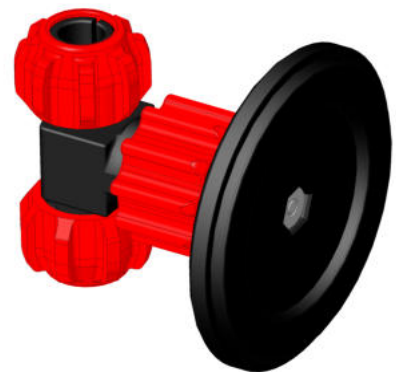

The Mag Dock is designed to work directly with MagSafe-compatible phones and phone cases. For phone cases that do not have MagSafe built in, the Mag Dock also includes an adhesive-backed metal ring that can be attached to the case to provide a compatible mounting surface.

MagSafe case?

You're ready to go.

No MagSafe?

We planned for that too.

How It Works

The Mag Dock attaches to a compatible Ridge Rack mounting point and provides a magnetic surface for holding your phone.

For MagSafe-compatible phones or cases, simply place the phone against the Mag Dock and allow the magnetic connection to hold it in position.

For non-MagSafe phone cases, install the included adhesive-backed metal ring on the outside of the case. Once installed, the ring allows the case to attach magnetically to the Mag Dock.

No clamps.

No phone-sized contraptions.

Just put the phone where you want it and pull it off when you need it.

Phone Compatibility

The Mag Dock is intended for use with:

- ◆ MagSafe-compatible phones
- ◆ MagSafe-compatible phone cases
- ◆ Standard phone cases using the included adhesive-backed metal ring
- ◆ Other cases with a suitable magnetic mounting ring already installed

Case thickness, materials, and accessories attached to the back of the phone may affect magnetic holding strength.

For best results, keep the contact area between the phone and Mag Dock as flat and unobstructed as possible.

Using the Included Metal Ring

If your phone case does not have MagSafe compatibility built in, the included metal ring can be attached to the outside of the case.

Before installation:

- ◆ Choose a flat area near the center of the phone case
- ◆ Make sure the mounting surface is clean and dry
- ◆ Position the ring carefully before pressing it into place
- ◆ Allow the adhesive to establish a secure bond before regular use

Once installed, the ring becomes the magnetic attachment point for the Mag Dock.

One little ring.

Whole new category of phone case.

For best results, keep the contact area between the phone and Mag Dock as flat and unobstructed as possible.

Advantages

Fast Attachment

Place the phone against the Mag Dock and you're mounted.

Quick Removal

Grab the phone whenever you need it without releasing clamps, straps, or locking mechanisms.

Works With More Than MagSafe Cases

The included adhesive-backed metal ring allows many standard phone cases to be used with the Mag Dock.

Compact Design

Keeps the phone mounting system small and unobtrusive.

Ridge Rack Compatibility

Designed to integrate directly into the modular Ridge Rack System.

Common Uses

Hammock Camping

Keep your phone visible while relaxing, reading, watching videos, or checking your navigation.

Saddle & Tree Stand Hunting

Mount your phone where it can be easily viewed without occupying valuable pocket or gear space.

Camp Setup

Keep maps, weather information, timers, music, or other frequently used apps within easy reach.

Fishing

Position your phone nearby for photos, navigation, weather information, or entertainment while using your Ridge Rack setup.

General Outdoor Use

Any place your Ridge Rack goes can become a convenient phone mounting location.

Field Manual Spec

Magnetic Mobile Device Docking Interface

Civilian Translation

Stick phone here.

Tips & Tricks

Use a MagSafe Case When Possible

A MagSafe-compatible case provides the cleanest setup and eliminates the need for the included metal ring.

Center the Metal Ring

If you're using the included adhesive ring, positioning it near the center of the phone case generally provides the most balanced connection.

Watch Case Thickness

Very thick cases or accessories between the case and Mag Dock may reduce magnetic holding strength.

Keep the Contact Surfaces Clean

Dirt, grit, or debris between the Mag Dock and phone case can reduce contact and may scratch surfaces over time.

Leave the Mag Dock Installed

If the Mag Dock is part of your regular Ridge Rack setup, leaving it attached between trips can make deployment even faster.

Final Words of Wisdom

Phones are useful.

Phones buried in pockets are slightly less useful.

Put it on the Mag Dock and keep it where you can actually see it.

BALL ADAPTER

Overview

The Ball Adapter turns the end of a Ridge Rack extension rod into an adjustable 1/4-20 mounting point for cameras, spotting scopes, and other compatible gear.

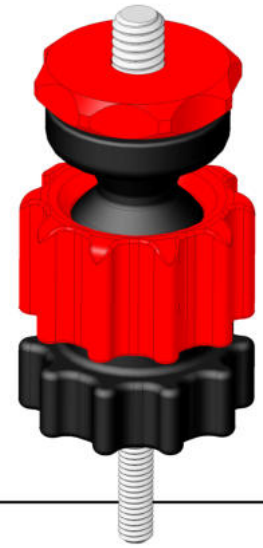

The bracket threads directly into the end of the extension rod, while the 1/4-20 mounting stud is positioned on an adjustable ball joint.

That gives you a wide range of movement for aiming, leveling, and positioning your equipment exactly where you want it.

Mount it.

Aim it.

Lock it down.

How It Works

The Ball Adapter screws directly into the threaded end of a compatible Ridge Rack extension rod.

Your device then attaches to the standard 1/4-20 threaded stud located on top of the adjustable ball.

Once the device is installed, loosen the ball adjustment, position the equipment where you want it, and tighten the adapter to hold that angle in place.

The included jam knob threads onto the 1/4-20 stud beneath the mounted device and allows you to lock the equipment securely against the mounting surface.

No extra mounting plate.

No complicated hardware.

Just a standard thread and a whole lot of adjustment.

Device Compatibility

The Ball Adapter works with equipment featuring a standard:

1/4-20 threaded mounting hole

Compatible equipment may include:

- ◆ Cameras
- ◆ Action camera adapters
- ◆ Spotting scopes

- ◆ Small optics
- ◆ Lights
- ◆ Monitors
- ◆ Instrument holders
- ◆ Phone mount adapters
- ◆ Other accessories using a standard 1/4-20 mounting interface

If it has a 1/4-20 mounting hole, there's a good chance the Ball Adapter can give it a home on the Ridge Rack.

Advantages

Maximum Adjustability

The ball-mounted stud allows equipment to be tilted and rotated through a wide range of positions.

Standard 1/4-20 Mount

Uses one of the most common mounting interfaces found on cameras, optics, and outdoor equipment.

Direct Extension Rod Mounting

Threads directly into the end of a Ridge Rack extension rod for a clean, compact setup.

Secure Device Positioning

The included jam knob helps lock equipment in place on the threaded stud.

Fast Repositioning

Adjust your viewing angle or camera position without rebuilding the entire setup.

Common Uses

Cameras

Position a camera for photos, video, time-lapse recording, or hands-free filming.

Spotting Scopes

Aim and position compatible spotting scopes while keeping them supported by the Ridge Rack.

Wildlife Observation

Mount cameras or optics for viewing birds, wildlife, or distant terrain.

Camp Photography

Set up a camera for group photos, campsite shots, or hands-free recording.

General Equipment Mounting

Use the Ball Adapter with lights, monitors, holders, or other accessories equipped with a standard 1/4-20 threaded mounting hole.

Field Manual Spec

Articulating 1/4-20 Equipment Positioning Interface

Civilian Translation

Point it wherever you want.

Tips & Tricks

Use the Jam Knob

Once your equipment is threaded onto the stud, snug the jam knob against it to help prevent unwanted rotation.

Adjust the Ball Last

Mount the device first, then use the ball joint to fine-tune the final position.

Great for Cameras

The adjustable ball makes it easy to level a camera even when the Ridge Rack itself isn't perfectly level.

Perfect for Spotting Scopes

Use the extension rod to establish the mounting position, then let the Ball Adapter handle the final aiming adjustment.

Think Beyond Cameras

The 1/4-20 standard is used on a huge variety of equipment.

If you've got an accessory with the right threaded hole, try it.

Final Words of Wisdom

Use the Jam Knob

Once your equipment is threaded onto the stud, snug the jam knob against it to help prevent unwanted rotation.

Adjust the Ball Last

Mount the device first, then use the ball joint to fine-tune the final position.

Double Ridgeline Clamp

Overview

The Double Ridgeline Clamp is designed for users who want the ultimate in ridgeline stability and positioning flexibility.

Unlike brackets that hang from a single attachment point, the Double Ridgeline Clamp secures directly to two separate ridgelines, creating an exceptionally stable mounting platform for Ridge Rack accessories.

The result is reduced movement, improved positioning, and a setup that feels more like a suspended workstation than a hanging accessory mount.

How It Works

The Double Ridgeline Clamp mounts directly to the universal connection points located at each end of the Ridge Rack carbon fiber shafts.

Each clamp features:

- ◆ A precision cord slot
- ◆ A threaded locking sleeve
- ◆ Tool-free installation
- ◆ Secure attachment to compatible cordage

To install, simply place the ridgeline into the clamp slot and tighten the threaded sleeve. The sleeve captures the cord securely while allowing quick installation and removal when it's time to break camp.

No knots.

No special tools.

No hammock engineering degree required.

Cord Compatibility

The Double Ridgeline Clamp is compatible with cordage up to:

0.125" (1/8") diameter

Compatible cord types may include:

- ◆ Hammock ridgelines
- ◆ Accessory lines

- ◆ Utility cord
- ◆ Shock cord (within size limits)
- ◆ Guy lines
- ◆ Other suitable cordage

If your cord fits in the slot, there's a good chance you're in business.

Advantages

Increased Stability

Two attachment points dramatically reduce unwanted movement.

Improved Positioning

Keeps accessories where you put them instead of where gravity negotiates them.

Reduced Swing

Less bouncing, less wobbling, and less chasing your phone around while lying perfectly still.

Fast Installation

Threaded sleeves make setup and removal quick and intuitive.

Universal Compatibility

Works with a wide variety of cordage-based setups.

Common Uses

Bridge Hammocks

Ideal for dual-ridgeline hammock systems.

Dual Ridgeline Setups

Create highly stable mounting locations between two support lines.

Camp Utility Stations

Suspend gear between fixed cordage points.

Phone & Tablet Mounting

Provides a stable platform for viewing devices while relaxing.

Lighting Systems

Keeps lanterns and lights positioned exactly where they're needed.

Field Manual Spec

Dual-Line Suspended Equipment Stabilization Interface

Civilian Translation

Twice the ridgelines. Half the wobble.

Tips & Tricks

Perfect for Bridge Hammocks

The Double Ridgeline Clamp was practically made for bridge hammock users who want a stable gear platform.

Build a Floating Command Center

Mount phones, lights, speakers, and other accessories without sacrificing valuable storage space.

Leave the Clamps Attached

Many users leave the clamps installed on their Ridge Rack shafts between trips for even faster setup.

Think Beyond Hammocks

Any pair of properly spaced cords can become a Ridge Rack mounting location.

If you can string two lines, you can probably build something useful.

Final Words of Wisdom

One ridgeline is good.

Two ridgelines are better.

Especially when you're trying to watch a movie without your phone swinging like a porch swing in a tornado.

Knuckle Bracket

Overview

The Knuckle Bracket adds something every modular system eventually needs:

A bend.

Designed to connect two carbon fiber shafts together, the Knuckle Bracket introduces an adjustable pivot point that allows the Ridge Rack to reach around obstacles, create offsets, improve viewing angles, and position accessories exactly where they're needed.

Because sometimes a straight line isn't the smartest path.

How It Works

The Knuckle Bracket attaches to the ends of two carbon fiber shafts and creates a fully adjustable joint between them.

Using the standard Ridge Rack radial spline system, the bracket locks securely into position once adjusted.

Unlike friction-based pivots that slowly droop over time, the radial spline creates positive engagement between positions, helping the assembly stay exactly where you put it.

Set the angle.

Lock it in.

Enjoy life.

Advantages

Angular Adjustment

Create bends and offsets anywhere in your Ridge Rack setup.

Positive Locking System

Uses the Ridge Rack radial spline for secure positioning.

Improved Accessory Placement

Move gear around obstacles or position it closer to where it's needed.

Expandable Design

Works seamlessly with existing carbon fiber shaft components.

Tool-Free Adjustment

Quickly reposition using the standard Ridge Rack adjustment hardware.

Common Uses

Phone Positioning

Bring your screen closer without moving the entire Ridge Rack.

Tablet & Monitor Support

Create comfortable viewing angles for larger devices.

Camp Workstations

Build multi-level equipment layouts.

Lighting Systems

Aim lights exactly where illumination is needed.

Content Creation

Fine-tune camera, phone, and monitor positioning.

"Just One More Adjustment"

The most common use of all.

Field Manual Spec

Articulated Multi-Axis Shaft Positioning Interface

Civilian Translation

Adds a bend where Mother Nature forgot to put one.

Tips & Tricks

Build Around Obstacles

Use the Knuckle Bracket to position gear around tent poles, chair arms, ridgelines, and other

obstructions.

Improve Viewing Angles

A small bend often creates a much more comfortable viewing position.

Stack Multiple Knuckles

Need more adjustment? Multiple Knuckle Brackets can be combined to create highly adaptable configurations.

Think in Three Dimensions

The Knuckle Bracket allows gear to move not just farther away, but also higher, lower, left, right, forward, and backward.

Your imagination will usually run out before the adjustment options do.

Final Words of Wisdom

Straight shafts are useful.

Bent shafts are useful too.

The trick is knowing when to use each one.

Fortunately, the Knuckle Bracket lets you decide.

Hook Bracket

Overview

Sometimes you don't need a fancy holder.

Sometimes you just need a place to hang stuff.

The Hook Bracket delivers exactly that.

Common Uses

Hats

Because nobody enjoys chasing a hat across a campground.

Headlamps

Always know where your light is.

Keys

Because losing your truck keys 10 miles from home builds character—but not the good kind.

Water Filtration Bags

Convenient gravity filter support.

Camp Accessories

Anything lightweight that benefits from hanging instead of disappearing.

Field Manual Spec

Universal Suspended Equipment Interface

Civilian Translation

A really nice place to hang things.

Magnetic Mount

Overview

The Magnetic Mount is the fastest phone mounting solution in the entire Ridge Rack ecosystem.

Designed specifically to accept the removable magnetic puck used by MagBak® phone cases, the Magnetic Mount allows your phone to attach and detach instantly while maintaining the adjustability and versatility that Ridge Rack users expect.

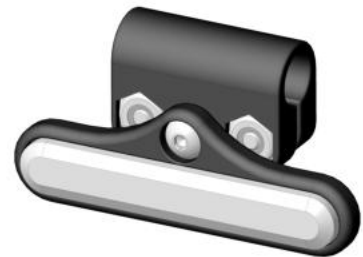

Simply snap your phone into place and get on with your adventure.

No clamps.

No straps.

No fumbling.

No "hold on, let me adjust this" moments.

How It Works

The Magnetic Mount is precision-designed to securely hold the MagBak magnetic puck (sold separately).

Once installed, the mount becomes a fully adjustable magnetic docking station for compatible MagBak-equipped phones.

The mount provides two independent adjustment axes:

Rotating Magnet Position

The magnetic puck can be rotated to position your phone exactly where you want it.

Switch between portrait and landscape orientation in seconds.

Perfect for:

- ◆ Navigation
- ◆ Movies
- ◆ Video calls
- ◆ Content viewing
- ◆ Camp entertainment

Shaft Rotation

The entire mount can also rotate around the Ridge Rack carbon fiber shaft, providing nearly unlimited positioning flexibility.

This makes it easy to fine-tune viewing angles whether you're sitting in a chair, relaxing in a hammock, or working at a camp table.

Why It Excels on Ridgelines

The Magnetic Mount shines when used with Ridge Rack ridgeline setups.

Traditional phone holders often require two hands and a bit of patience.

The Magnetic Mount requires neither.

Simply reach up, snap your phone into place, and relax.

Need your phone?

Grab it and go.

Need it back?

Snap.

Done.

It's about as close to magic as we're legally allowed to advertise.

Features

Lightning-Fast Phone Attachment

Attach or remove your phone in seconds.

Portrait or Landscape Viewing

Rotate your device to match the activity.

Multi-Axis Positioning

Adjust both the magnet angle and shaft position independently.

Ridgeline Optimized

Perfect for hammock campers who want easy access to their devices.

Lightweight Design

Minimal weight with maximum convenience.

Compatibility

Designed specifically to accept the magnetic puck used by **MagBak®** phone mounting systems.

Important Note

The magnetic puck is **not included**.

The Magnetic Mount is designed to fit the MagBak magnet perfectly, allowing Ridge Rack users to integrate existing MagBak equipment into their setup.

Common Uses

- ◆ Hammock ridgelines
- ◆ Camp chairs
- ◆ Bedside phone station
- ◆ Camp tables
- ◆ Video calls
- ◆ Navigation display
- ◆ Movie watching
- ◆ Content creation

- ◆ Mobile workstations

Field Manual Spec

Rapid Deployment Magnetic Device Interface

Civilian Translation

The fastest way we've found to stick a phone where you want it.

Tips & Tricks

Perfect for Hammocks

The Magnetic Mount allows one-handed phone attachment while lounging comfortably.

Switch Orientations Instantly

Rotate between portrait and landscape mode without changing mounts.

Leave It Ready

Many users leave the MagBak magnet permanently installed in the mount for instant setup.

Great for Nighttime Use

When you're half asleep in a hammock, magnets are much easier to use than clamps.

Final Words of Wisdom

Life is too short to wrestle with phone holders.

Snap.

Click.

Relax.

That's the whole idea.

MagBak® is a registered trademark of MagBak, Inc. Ridge Runner Gear is not affiliated with or endorsed by MagBak. The Magnetic Mount is designed for compatibility with the MagBak magnetic puck.

Future Accessories

The Ridge Rack ecosystem continues to grow.

Future accessories may include:

- ◆ Fan mounts
- ◆ Camera mounts
- ◆ Tool holders
- ◆ Fishing accessories
- ◆ Navigation tools
- ◆ Utility organizers
- ◆ Lighting systems
- ◆ Whatever crazy idea we dream up next

One thing is certain:

If it helps organize gear, improves camp life, or solves a problem worth solving, we're probably working on it.

Final Words of Wisdom

The Ridge Rack wasn't designed to hold one thing.

It was designed to hold whatever makes your adventure better.

Build your setup.

Make it yours.

Run The Ridge.

What gear do you run?

Ridge Rack Prebuilt Kits

Not Sure Where to Start? We've Got You Covered.

The Ridge Rack system was designed to be modular, expandable, and highly customizable.

That's great news for gear nerds.

But if you're staring at a pile of brackets, shafts, mounts, and accessories wondering where to begin, the Ridge Rack Prebuilt Kits are for you.

Each kit combines carefully selected Ridge Rack components into purpose-built configurations designed around specific activities and environments. Whether you're relaxing in a hammock, organizing camp, managing electronics, or building the ultimate mobile workstation, there's a kit designed to get you up and running quickly.

No guesswork.

No compatibility charts.

No late-night engineering sessions around the campfire.

Just open the box and start organizing your gear.

Why Choose a Prebuilt Kit?

Proven Configurations

Each kit is built from combinations we've tested and actually use.

You're not buying random parts.

You're buying a system designed to work together.

Save Time

Instead of researching every bracket and accessory individually, you can start with a complete solution and expand later as your needs grow.

Expand Anytime

Every prebuilt kit uses the same Ridge Rack Core System.

That means today's kit can become tomorrow's custom setup simply by adding accessories, brackets, or shafts.

Faster Setup

The hard decisions have already been made.

We've done the thinking so you can spend more time adventuring and less time comparing part numbers.

One System. Endless Possibilities.

Every Ridge Rack kit is built around the same modular platform.

That means components can move between kits, accessories can be upgraded, and future Ridge Runner Gear products can be integrated without replacing your existing equipment.

Think of your first Ridge Rack kit as a starting point—not a final destination.

Most Ridge Rack owners begin with one kit.

Few stop there.

Choosing the Right Kit

Ask yourself a simple question:

"Where will I use my Ridge Rack the most?"

If you're a hammock camper, start there.

If you're a camp chair lounge, there's a kit for that.

If you're building a mobile workstation, we've got options.

If you're not sure yet, don't worry.

The Ridge Rack is designed to adapt as your adventures evolve.

Field Manual Spec

Preconfigured Modular Equipment Deployment Systems

Civilian Translation

The easiest way to become a Ridge Rack addict.

Final Words of Wisdom

There are two types of Ridge Rack owners:

Those who buy a prebuilt kit.

And those who eventually realize they should have.

Either way, welcome to the Ridge.

Ridge Rack Single Line Kit

Your Hammock's New Best Friend

The Ridge Rack Single Line Kit is purpose-built for gathered-end hammocks that utilize a single structural ridgeline.

Instead of stuffing your phone in a pocket, balancing a lantern on your chest, or hanging gear from whatever happens to be nearby, the Single Line Kit creates an organized equipment station directly above you.

Everything stays within easy reach while remaining off the ground, out of the dirt, and exactly where you left it.

Imagine that.

What It Does

The Single Line Kit mounts directly to your hammock ridgeline using the Ridge Rack Single Ridgeline Bracket.

Once installed, it creates a stable platform for mounting a variety of Ridge Rack accessories, including:

- ◆ Phone holders
- ◆ Magnetic phone mounts
- ◆ Lanterns
- ◆ Utility hooks
- ◆ Future Ridge Rack accessories

Whether you're relaxing, reading, watching a movie, checking the weather, or pretending you're checking the weather while actually scrolling social media, your gear stays right where you need it.

Why You'll Love It

No More Pocket Fishing

You know the routine.

Phone in pocket.

Phone slides behind you.

Phone disappears.

Awkward hammock gymnastics begin.

The Single Line Kit fixes that.

Keep Gear Off the Ground

Mud.

Sand.

Leaves.

Ants.

Mysterious campsite goo.

Your gear deserves better.

Instant Access

Everything stays within arm's reach without cluttering your hammock.

Lightweight & Packable

Built around carbon fiber shafts and Ridge Rack modular components, the Single Line Kit adds functionality without adding unnecessary weight and in an easy to pack shape.

Common Uses

Movie Night in the Hammock

Position your phone directly where you want it and enjoy hands-free viewing.

Camp Lighting

Mount a lantern above your hammock for convenient nighttime illumination.

Audio Station

Keep your speaker nearby without sacrificing valuable hammock real estate.

Mobile Command Center

Monitor weather, maps, messages, trail information, or tomorrow's fishing forecast from the comfort of your hammock.

Bedside Replacement

Many users discover their hammock setup is more organized than their actual bedroom.

Field Manual Spec

Single-Line Suspended Equipment Deployment Platform

Civilian Translation

Turns your hammock ridgeline into a floating nightstand.

Tips & Tricks

Pair It With the Magnetic Mount

The combination creates one of the fastest phone mounting systems available for hammock campers.

Keep Frequently Used Gear Close

Phone, headlamp, speaker, and water bottle accessories are the most popular hammock companions.

Find Your Sweet Spot

Adjust the angle so that you can lay flat on your pillow and look naturally at the screen.

Leave It Ready

Many users leave accessories attached between trips for even faster deployment at camp.

Who It's For

The Single Line Kit is ideal for:

- ◆ Gathered-end hammock campers
- ◆ Backpackers
- ◆ Campers seeking lightweight organization
- ◆ Relaxation enthusiasts
- ◆ People who are tired of losing their phone in a hammock

Final Words of Wisdom

A hammock is supposed to help you relax.

Digging through pockets, balancing gear on your chest, and searching for your phone in the dark is not relaxing.

The Single Line Kit solves all three.

You're welcome.

Run The Ridge.

Ridge Rack Double Line Kit

Maximum Stability. Maximum Organization.

The Ridge Rack Double Line Kit is designed specifically for bridge hammocks and other dual-ridgeline setups where stability is the top priority.

By mounting to two independent ridgelines, the Double Line Kit creates an exceptionally stable platform for your gear while maintaining the lightweight simplicity that Ridge Rack users expect.

The result is a floating organization station that feels less like a hanging accessory mount and more like a suspended workstation.

Less movement.

Less wobble.

More comfort.

What It Does

The Double Line Kit attaches directly to two parallel ridgelines using Ridge Rack Double Ridgeline Clamps and an extension shaft.

This dual-line design creates a stable mounting platform for a variety of Ridge Rack accessories, including:

- ◆ Phone Holders
- ◆ Magnetic Mounts
- ◆ Hook Brackets
- ◆ Future Ridge Rack accessories

Because your gear should stay where you put it—not where gravity and momentum decide it belongs.

Why Two Lines Matter

Single ridgeline systems are fantastic.

Dual ridgeline systems are even better when stability matters.

With two attachment points, the Double Line Kit:

Reduces Swing

Less side-to-side movement means accessories remain easier to use.

Improves Viewing

Phones and tablets stay positioned where you left them.

Increases Comfort

Less adjustment means more relaxing.

Creates More Usable Space

The wider mounting platform allows accessories to be spread out for improved organization and increase interior space when a hammock cover is used.

Perfect for Bridge Hammocks

The Double Line Kit was built with bridge hammock campers in mind.

Bridge hammocks naturally create an ideal platform for dual-line mounting systems, allowing the Ridge Rack to take full advantage of the additional stability available from two support points.

Whether you're using a bridge hammock for overnight camping, backyard lounging, or extended trips, the Double Line Kit helps keep your essentials organized and within easy reach.

Common Uses

Floating Entertainment Center

Watch movies, read books, follow maps, or browse trail information without balancing your phone on your chest.

Camp Lighting Station

Position lanterns exactly where you need them for maximum illumination.

Bedside Storage

Keep essentials within reach while keeping your hammock clutter-free.

Mobile Command Center

Weather forecasts, navigation apps, trail notes, fishing reports, camp checklists, and other critical "research."

Field Manual Spec

Dual-Line Stabilized Equipment Deployment Platform

Civilian Translation

Turns your hammock into a floating command center.

Tips & Tricks

Pair It With a Magnetic Mount

The added stability of the Double Line Kit makes magnetic phone mounting feel almost effortless. Use the gear clamps to hold a fan while your phone mounts to the magnet.

Spread Out Your Gear

Take advantage of the wider platform by separating lighting, electronics, and utility accessories.

Find the Center

Position frequently used accessories near the center of your field of view for maximum comfort.

Set It Once

Many users find their favorite setup quickly and leave accessories positioned between trips for lightning-fast deployment.

Who It's For

The Double Line Kit is ideal for:

- ◆ Bridge hammock campers
- ◆ Dual-ridgeline hammock users
- ◆ Campers who prioritize stability
- ◆ Movie watchers
- ◆ Readers
- ◆ Gadget lovers
- ◆ Anyone who appreciates organized gear

Advantages Over Single Line Systems

Feature	Single Line Kit	Double Line Kit
Fast Setup	✓	✓
Lightweight	✓	✓
Stable Viewing	Good	Excellent
Reduced Swing	Good	Excellent
Wider Accessory Placement	Limited	Expanded
"Wow, That's Nice" Factor	High	Very High

Final Words of Wisdom

The Single Line Kit keeps your gear organized.

The Double Line Kit keeps your gear organized and acts like it knows what it's doing.

When your phone stays put, your lantern stays aimed, and your speaker stays exactly where you left it, you'll understand why two lines are better than one.

Twice the ridgelines. Half the wobble.

Run The Ridge.

Ridge Rack Universal Kit

One Kit. Nearly Unlimited Possibilities.

If you're only going to own one Ridge Rack kit, this is the one we recommend.

The Ridge Rack Universal Kit is built around the Universal Mount Bracket—the most versatile mounting platform in the entire Ridge Rack ecosystem. Designed to attach to a wide variety of structures, this kit allows you to take your Ridge Rack almost anywhere your adventures lead.

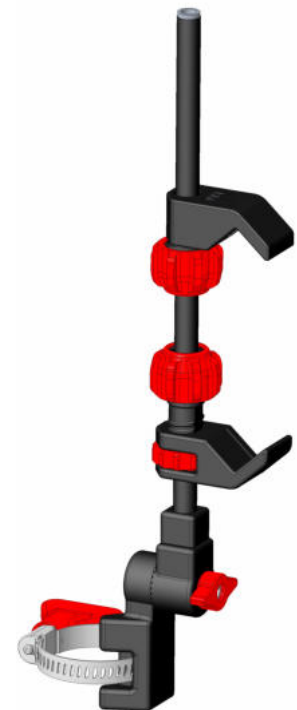

Camp chair?

Yep.

Tent pole?

Absolutely.

Kayak rail?

No problem.

Tree branch?

Usually.

That weird thing at camp you don't know the name of?

Probably.

What It Does

The Universal Kit transforms almost any suitable structure into a stable Ridge Rack mounting platform.

Using the Universal Mount Bracket, you can quickly attach your Ridge Rack and accessories wherever they're needed most.

Whether you're camping, fishing, kayaking, tailgating, relaxing on the back porch, attending a sporting event, or building the world's most over-engineered camp chair setup, the Universal Kit adapts to the environment.

Not the other way around.

Why Choose the Universal Kit?

Maximum Flexibility

The Universal Mount Bracket offers the broadest range of mounting options in the Ridge Rack lineup.

One day it may be attached to your camp chair.

The next day it may be mounted to a kayak.

The day after that, it's holding your phone at a tailgate party.

One Kit, Multiple Adventures

Instead of purchasing different systems for different activities, the Universal Kit allows one Ridge Rack to serve many purposes.

Set It and Forget It

Many users leave the Universal Mount Bracket attached to their favorite chair, kayak, workstation, or camp setup and simply swap accessories as needed.

Future Ready

As new Ridge Rack accessories are released, they can be added directly to your existing Universal Kit.

Common Uses

Camp Chair Command Center

Create the ultimate campsite relaxation station with phone holders, cup holders, lights, and accessories.

Tent Pole Utility Station

Mount lighting, hydration accessories, and other camp essentials.

Workshop Assistant

Organize tools, phones, tablets, and reference materials while working.

Tailgating & Events

Keep drinks, phones, speakers, and gear organized while enjoying the event.

Everyday Convenience

Many owners discover their Ridge Rack gets used as often at home as it does outdoors.

Compatible Mounting Locations

The Universal Mount Bracket is designed to fit structures ranging from:

0.375" to approximately 1.375" in diameter

Some Ridge Rack users choose to replace the included hose clamp with a longer clamp to expand the range of compatible mounting locations.

This can allow attachment to larger chair frames, oversized rails, tree limbs, table legs, and other structures that exceed the standard clamp range.

As always, verify that the mounting location is strong enough to support the attached equipment and ensure the bracket is securely fastened before use.

Common mounting surfaces include:

- ◆ Camp chairs
- ◆ Fishing chairs
- ◆ Kayak rails
- ◆ Tent poles
- ◆ Shelter poles
- ◆ Table supports
- ◆ Deck railings
- ◆ Tree branches

- ◆ Workshop fixtures
- ◆ Utility poles
- ◆ Countless other compatible structures

If it fits in the clamp, you're probably in business.

Field Manual Spec

Multi-Environment Equipment Deployment System

Civilian Translation

The Swiss Army Knife of Ridge Rack kits.

Tips & Tricks

Leave the Bracket Mounted

Many users permanently install the Universal Mount Bracket on frequently used gear and simply move accessories between locations.

Build Your Perfect Setup

The Universal Kit is often the starting point for highly customized Ridge Rack systems.

Think Beyond Camping

The Universal Kit works just as well in garages, workshops, offices, RVs, patios, and backyard hangouts.

Expand as Needed

Add phone holders, magnetic mounts, cup holders, Hydro Hangers, Lantern Latchers, and future accessories without replacing the core system.

Who It's For

The Universal Kit is ideal for:

- ◆ Campers
- ◆ Kayakers
- ◆ Anglers
- ◆ RV owners
- ◆ Tailgaters
- ◆ Workshop tinkerers

- ◆ Gadget lovers
- ◆ People who appreciate organized gear
- ◆ Anyone who likes making things more useful

Final Words of Wisdom

The Universal Kit was built for people who refuse to buy five different gadgets when one good gadget will do.

Clamp it.

Customize it.

Take it anywhere.

That's why we call it Universal.

Run The Ridge.

What gear do you run?

Ridge Rack Pole Mount Kit

Lightweight. Fast. Ready Anywhere.

The Ridge Rack Pole Mount Kit is designed for campers, backpackers, and outdoor enthusiasts who want maximum versatility with minimal weight.

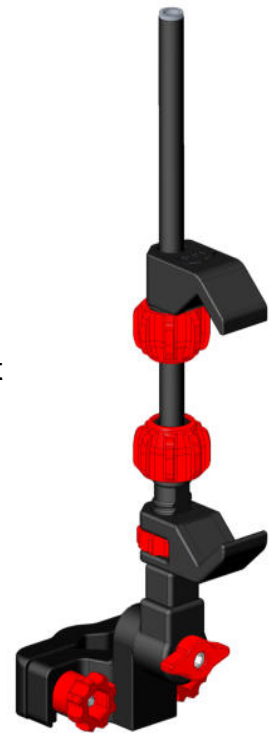

Built around the Ridge Rack Pole Mount Bracket, this kit quickly attaches to compatible poles ranging from **0.500" to 0.812" in diameter**, making it ideal for trekking poles, tent poles, camp chair frames, backpacking chairs, and countless other outdoor structures.

If the Universal Kit is the Swiss Army Knife of the Ridge Rack family, the Pole Mount Kit is the quick installation specialist.

Simple.

Fast.

Effective.

What It Does

The Pole Mount Kit transforms ordinary poles into useful gear management stations.

Instead of leaving your phone, lantern, speaker, or accessories scattered around camp, the Pole Mount Kit keeps them elevated, organized, and within reach.

Compatible Ridge Rack accessories include:

- ◆ Phone Holders
- ◆ Fan Mounts
- ◆ Magnetic Mounts
- ◆ Hook Brackets
- ◆ Future Ridge Rack accessories

Because camp life is easier when your gear has a designated place to live.

Why Choose the Pole Mount Kit?

Fast Setup

The Pole Mount Bracket installs and removes quickly, making it ideal for campers who frequently set up and break down camp.

Less fiddling.

More relaxing.

Uses Existing Gear

Your trekking pole, tent pole, or camp chair frame is already coming with you.

Why not let it do another job?

Compact & Packable

The Pole Mount Kit packs small and deploys quickly without requiring large mounting hardware.

Common Uses

Trekking Pole Utility Station

Convert a trekking pole into a convenient accessory stand for lighting, hydration, electronics, and camp organization.

Tent Pole Command Center

Keep phones, lanterns, and camp essentials elevated and accessible.

Camp Chair Convenience

Mount accessories directly to compatible camp chair frames.

Gravity Filtration Support

Pair with the Hydro Hanger to create a compact water filtration station.

Camp Lighting Station

Position lanterns and lighting exactly where they're needed.

Compatible Pole Sizes

The Pole Mount Bracket is designed for mounting surfaces between:

0.500" and 0.812" diameter

Common examples include:

- ◆ Trekking poles
 - ◆ Tent poles
 - ◆ Camp chair tubing
 - ◆ Backpacking chair frames
 - ◆ Shelter poles
 - ◆ Utility poles within size limits
-

Field Manual Spec

Rapid Deployment Pole-Based Equipment Management System

[Civilian Translation](#)

Turns your trekking pole into a surprisingly useful employee.

Tips & Tricks

Build a Lightweight Camp Utility Pole

Combine the Pole Mount Kit with a trekking pole and Hook Bracket to create a versatile camp organization station.

Perfect for Backpacking

The Pole Mount Kit provides many of the benefits of larger Ridge Rack systems while keeping weight and bulk to a minimum.

Think Vertical

Getting gear off the ground often makes camp feel more organized than adding more gear ever could.

Use What You're Already Carrying

One of the smartest ways to save weight is to make existing gear do multiple jobs.

The Pole Mount Kit excels at exactly that.

Who It's For

The Pole Mount Kit is ideal for:

- ◆ Backpackers
- ◆ Hammock campers
- ◆ Tent campers
- ◆ Minimalists
- ◆ Trekking pole users
- ◆ Camp organization enthusiasts
- ◆ Anyone who appreciates lightweight versatility

Why People Love It

Most outdoor gear serves one purpose.

The Pole Mount Kit turns gear you're already carrying into a platform for several more.

That's a pretty good return on investment for a trekking pole.

Final Words of Wisdom

Your trekking pole already supports you all day.

The least it can do is hold your phone after work.

Run The Ridge.

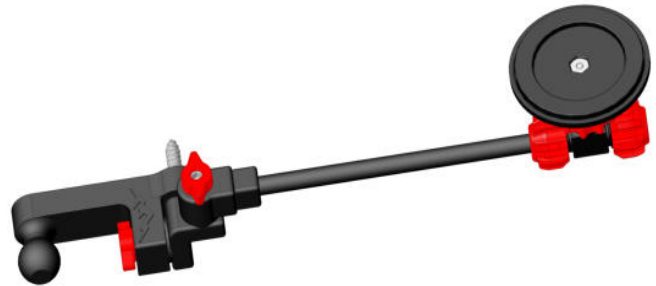

What gear do you run?

Ridge Rack Saddle Hunter Kit

Lightweight. Compact. Built for the Tree.

The Ridge Rack Saddle Hunter Kit is designed for saddle hunters who want a simple way to keep their phone visible, accessible, and off their gear loops.

Built around the **Tree Hub Bracket** and **Mag Dock**, the kit creates a dedicated phone mounting station directly on the tree.

Mount the Tree Hub.

Position the Mag Dock.

Put your phone where you can actually use it.

Simple.

Compact.

Exactly where you need it.

What It Does

The Saddle Hunter Kit turns the tree you're already hunting from into a convenient phone mounting location.

Instead of keeping your phone buried in a pocket, hanging from a tether, or trying to balance it somewhere questionable, the Mag Dock keeps it positioned within easy reach.

Use it for:

- ◆ Filming your hunts
- ◆ Mapping apps
- ◆ Weather information
- ◆ Messaging
- ◆ Checking the time
- ◆ Hunting apps
- ◆ Photos and video
- ◆ Entertainment during long sits

Because sometimes the woods are peaceful.

And sometimes you've been sitting there for four hours.

Why Choose the Saddle Hunter Kit?

Keeps Your Phone Accessible

Your phone stays where you can see and reach it without digging through pockets or shifting around in the saddle.

Tree-Mounted Design

The Tree Hub gives the Ridge Rack System a dedicated mounting point directly on the tree.

No stand.

No table.

No extra piece of furniture hanging 20 feet in the air.

Magnetic Phone Attachment

The Mag Dock makes attaching and removing your phone quick and easy.

Grab it when you need it.

Put it back when you're done.

Works With Non-MagSafe Cases

The included adhesive-backed metal ring allows many standard phone cases to work with the Mag Dock.

Common Uses

Navigation

Keep mapping and hunting apps visible without constantly pulling your phone from a pocket.

Weather Monitoring

Check changing conditions without reorganizing half your gear.

Communication

Keep your phone close for messages and calls while minimizing unnecessary movement.

Photos & Video

Keep the phone positioned nearby when you want to capture something quickly.

Long Sits

Sometimes you're watching deer.

Sometimes you're watching YouTube.

We don't judge.

Field Manual Spec

Arboreal Magnetic Mobile Device Positioning System

Civilian Translation

Puts your phone on the tree instead of in your pocket.

Tips & Tricks

Set It Up Before You Settle In

Mount and position the Saddle Hunter Kit early so you're not trying to adjust equipment once you're comfortable.

Position It Within Your Natural Reach

The goal is convenience.

Mount the phone where you can reach it without stretching, twisting, or making unnecessary movement.

Use a MagSafe Case When Possible

A MagSafe-compatible case provides the cleanest setup with the Mag Dock.

If yours isn't MagSafe compatible, that's what the included metal ring is for.

Make the Tree Work for You

You're already carrying enough equipment into the woods.

The Saddle Hunter Kit takes advantage of the biggest piece of equipment that's already waiting for you.

The tree.

Who It's For

The Pole Mount Kit is ideal for:

- ◆ Backpackers
- ◆ Saddle hunters
- ◆ Anyone tired of digging through pockets for their phone
- ◆ Mobile hunters
- ◆ Camp organization enthusiasts

- ◆ Anyone who appreciates lightweight versatility

Why People Love It

- ◆ Saddle hunting is all about keeping equipment compact, efficient, and within reach.
- ◆ The Saddle Hunter Kit follows the same philosophy.
- ◆ It doesn't try to turn the tree into a desk.
- ◆ It just gives your phone a better place to live.

Final Words of Wisdom

Your phone probably cost more than most of the gear hanging from your saddle. Maybe it deserves something better than a cargo pocket.

Ridge Rack Monopod Kit

Why Carry a Tripod When You're Already Carrying a Trekking Pole?

The Ridge Rack Monopod Kit was designed around a simple idea:

Most hikers, backpackers, and campers already carry trekking poles.

So why carry a separate tripod or camera mount too?

The Monopod Kit transforms your trekking pole into a lightweight photography platform, phone mount, content creation station, and camp utility system while adding minimal weight to your pack.

Because gear that performs multiple jobs earns its place in your backpack.

What It Does

The Ridge Rack Monopod Kit allows phones, cameras, and Ridge Rack accessories to mount directly to compatible trekking poles using the Ridge Rack Pole Mount System.

It also integrates seamlessly with existing tripods, allowing users to quickly transition between stationary tripod use and lightweight trekking pole deployment.

One mount.

Multiple platforms.

Endless opportunities to convince yourself you don't need another gadget.

Phone Mounting

Attach your phone to a trekking pole for:

- ◆ Photography
- ◆ Video recording
- ◆ Selfies
- ◆ Video calls
- ◆ Navigation
- ◆ Time-lapse recording
- ◆ Camp entertainment

Because balancing your phone against a rock only works until the wind votes otherwise.

Camera Compatibility

The Monopod Kit supports cameras and accessories equipped with the industry-standard:

1/4-20 threaded mounting interface

Compatible equipment may include:

- ◆ Compact cameras
- ◆ Action cameras
- ◆ Mirrorless cameras
- ◆ Small lighting systems
- ◆ Microphones
- ◆ Other 1/4-20 compatible accessories

Tripod Compatible

Already own a tripod?

Perfect.

The Monopod Kit can mount directly to existing tripods, allowing the same phone or camera setup to move seamlessly between tripod and trekking pole use.

One setup.

No reconfiguration.

No frustration.

No searching for the adapter you swore you packed.

Why You'll Love It

Save Weight

Your trekking pole is already in your pack.

Let it do more.

Save Space

One piece of gear replaces another.

Backpackers call that a win.

Faster Setup

Deploy your phone or camera in seconds.

Great for Content Creators

Perfect for:

- Trail videos
- Campsite photography
- Product reviews
- Adventure content
- Social media posts
- Video conferencing from places your coworkers wish they were

Common Uses

Hiking Photography

Capture trail photos without carrying a dedicated monopod.

Campsite Content Creation

Film gear reviews, tutorials, and adventure updates.

Time-Lapse Recording

Position your phone or camera for hands-free recording.

Group Photos

Finally get yourself in the picture instead of always being the photographer.

Camp Utility Pole

Use the same system to support lights, accessories, and other Ridge Rack gear around camp.

Field Manual Spec

Multi-Platform Optical Equipment Deployment System

Civilian Translation

Turns your trekking pole into a camera crew.

Tips & Tricks

Pair With a Magnetic Mount

The Magnetic Mount creates one of the fastest phone deployment systems available for content creators.

Utilize Guy Lines

Stabilize the monopod with three stakes and guy lines you probably already have.

Use Existing Gear

The best way to save weight is not carrying things you don't need.

Great for Backpacking

Many users find the Monopod Kit eliminates the need for a dedicated tripod entirely.

Think Beyond Cameras

Any lightweight 1/4-20 accessory can become part of your Ridge Rack setup.

Who It's For

The Monopod Kit is ideal for:

- ◆ Backpackers
- ◆ Hikers
- ◆ Content creators
- ◆ Photographers
- ◆ Campers
- ◆ Minimalists

- ◆ Gear nerds
- ◆ People who enjoy making one piece of gear do three jobs

Final Words of Wisdom

A dedicated tripod works great.

A trekking pole that becomes a monopod works even better.

Because every ounce you leave at home is one less ounce you have to carry up the mountain.

Run The Ridge.

What gear do you run?

How the Ridge Rack System Works

Three Steps. Unlimited Possibilities.

The Ridge Rack system was designed around one simple concept:

Choose how you want to mount it. Choose how far you want it to reach. Add the accessories you need.

That's it.

No complicated compatibility charts.

No engineering degree required.

No need to spend three evenings reading the manual while your family wonders what happened to you.

Every Ridge Rack configuration follows the same three-step process.

Step 1: Choose Your Mount

Start by deciding where you want to use your Ridge Rack.

Different brackets are designed for different environments:

Hammock Ridgelines

- ◆ Single Ridgeline Bracket
- ◆ Double Ridgeline Clamp

Camp Chairs & Kayaks

- ◆ Universal Mount Bracket

Trekking Poles & Tent Poles

- ◆ Pole Mount Bracket
- ◆ Monopod Mount

Tables & Desktops

- ◆ MiniPod Base

Custom Applications

- ◆ Universal Mount Bracket
- ◆ Gear Clamp Brackets
- ◆ Hook Brackets

Think of the mount as the foundation of your Ridge Rack.

Everything else builds from there.

Step 2: Choose Your Length

Next, determine how much reach you need.

The Ridge Rack uses lightweight carbon fiber shafts to position accessories exactly where you want them.

Short shaft?

Compact setup.

Long shaft?

More reach.

Extra-long shaft?

Congratulations, you're probably building something interesting.

Need even more space?

Additional shafts and Knuckle Brackets can be combined to create highly customized configurations.

The only real limit is your imagination.

And occasionally gravity.

Step 3: Build Your Setup

Now for the fun part.

Add the accessories that fit your adventure.

Popular combinations include:

Hammock Setup

- ◆ Phone Holder
- ◆ Magnetic Mount

Camp Chair Setup

- ◆ Fan Holder
- ◆ Phone Holder

Backpacking Setup

- ◆ Hook Bracket
- ◆ Magnet Mount

Mobile Workstation

- ◆ Gear Clamp Brackets
- ◆ Phone Holder
- ◆ Tablet Mount

Content Creator Setup

- ◆ Monopod Mount
- ◆ Magnetic Mount

Or create your own combination.

There are no wrong answers.

Well... there are a few wrong answers, but they're usually entertaining.

Field Manual Spec

Modular Three-Stage Equipment Deployment Methodology

Civilian Translation

Pick a mount. Pick a length. Add cool stuff.

The Ridge Rack Philosophy

Most gear systems tell you exactly how they must be used.

The Ridge Rack gives you the building blocks and lets you decide.

Start simple.

Expand later.

Build what works for you.

Because the best setup isn't the one we imagined.

It's the one that solves your problem.

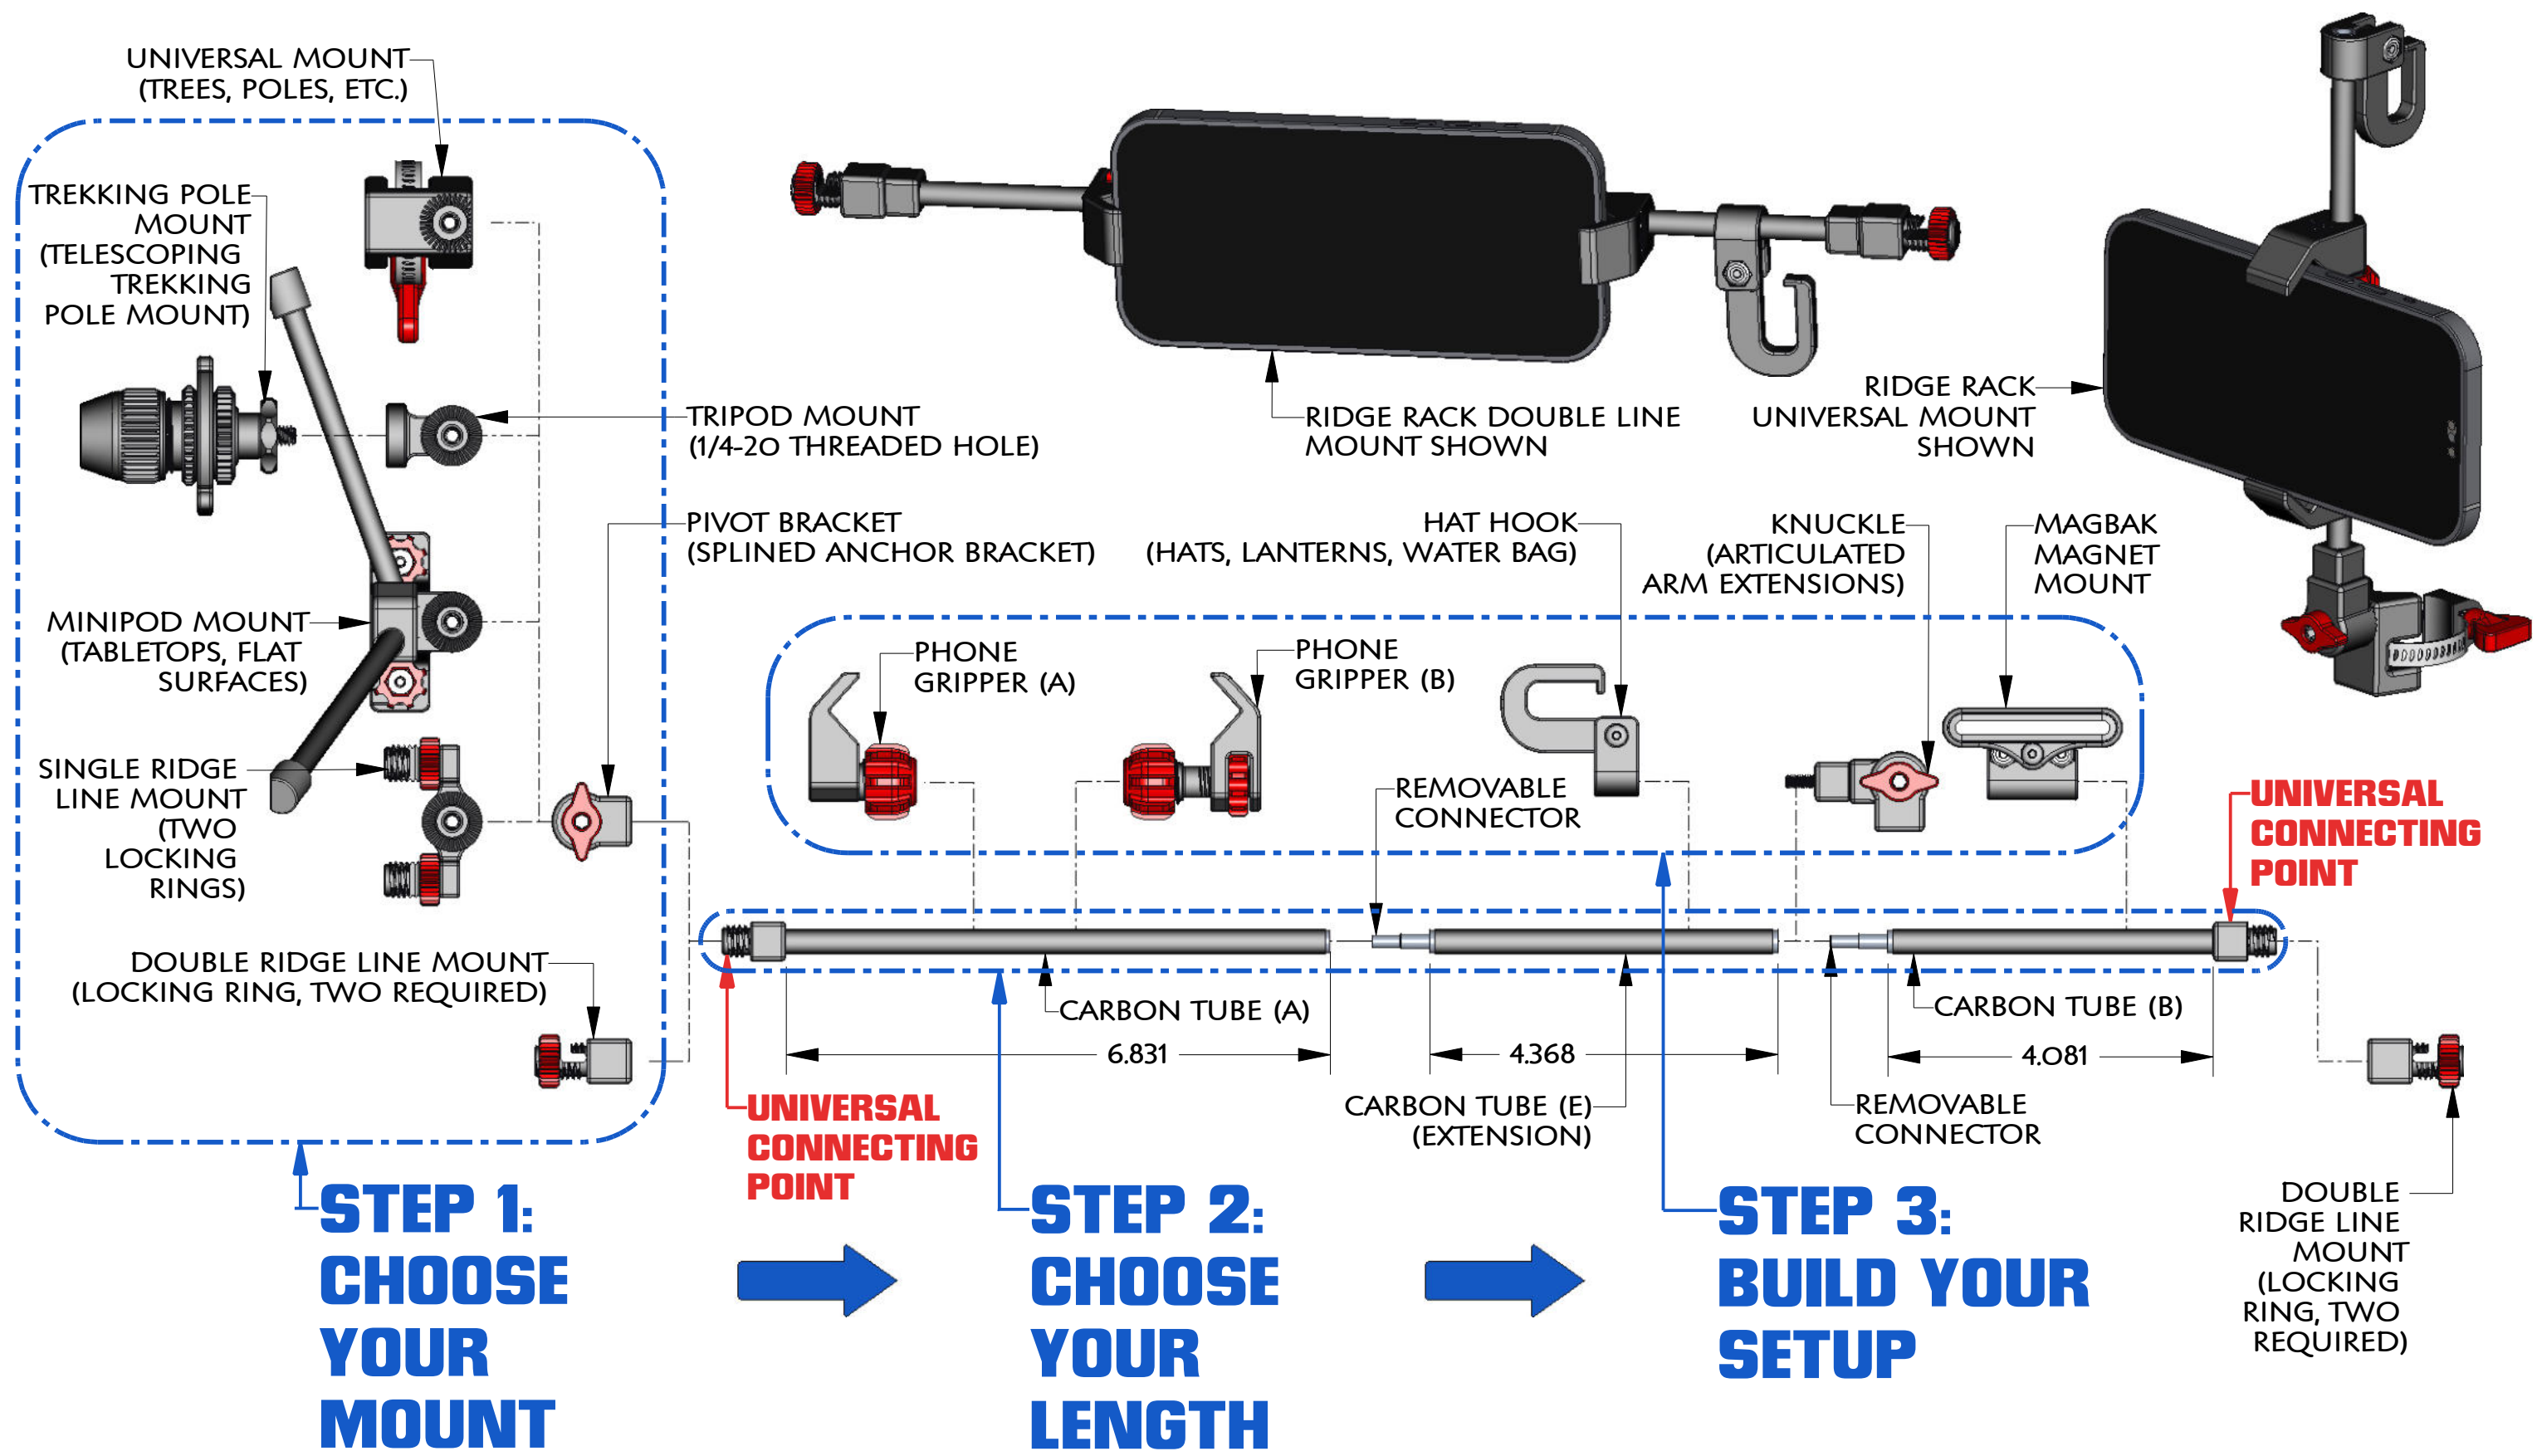

Ridge Rack Tips & Tricks

- ◆ **Find Your Sweet Spot** – Adjust the arm and accessories until everything sits right where you want it. If you're reaching, twisting, or performing campground gymnastics to grab your phone or drink, move the Ridge Rack—not your spine.
- ◆ **You Chill** – Before settling into your chair, hammock, kayak, or favorite camp spot, give everything a quick wiggle test. A five-second inspection beats watching your gear perform an unscheduled gravity test.
- ◆ **Travel Light, Live Large** – The Ridge Rack packs small but works hard. Toss it in your backpack, glove box, gear tote, or camp bin. It takes up less room than the snacks you'll probably bring anyway.
- ◆ **Think Beyond the Campsite** – The Ridge Rack works anywhere gear needs a home. Campsites, fishing trips, tailgates, sporting events, workshops, garages, back porches, and those Zoom meetings where you pretend you're paying attention.

Care & Feeding of Your Ridge Rack (Because Even Racks Deserve TLC)

- ◆ **Keep it clean:** Knock off dirt, mud, and snack crumbs after each trip. A clean Ridge Rack holds accessories—not evidence from your last camping trip.
- ◆ **Soap, not science experiments:** Rinse with mild soap and water. If the bottle has more warning labels than instructions, keep it away from your gear.
- ◆ **Dry it off:** Water and plastic ain't best friends. Put it away soaked, and you'll get a special scent known as "Eau de Campsite Dumpster" in no time.
- ◆ **Don't roast it:** ASA plastic's tough and UV-resistant, but it ain't cast iron. Don't bake it

HOW THE RIDGE RACK SYSTEM WORKS

in a hot truck or leave it by the fire pit unless you want modern art.

Final Words of Wisdom

Mount it, adjust it, enjoy it — because good gear should work harder than you.
Run The Ridge.

Trick Out Your Ridge Rack: Optional Gear for Overachievers

Yak Rack: Your Kayak's New MVP

The Yak Rack turns your kayak into a fully loaded fishing machine! It mounts your Rocket Reel and Tackle Toter tackle box right into standard T-slots—no drilling, no fuss. With the same trusty trigger mechanism as the Ridge Rack, plus a quick-lock sliding arm to secure your tackle box, everything stays put even when the action heats up. The articulated mount adjusts to your setup and pops off quickly when it's time to pack up. Paddle, cast, conquer—yak-style.

Tack Rack: Your Chair's Tackle Sidekick

The Tack Rack keeps your Ridge Rack right where you need it—mounted to your camp chair or any round pole for hands-free, hassle-free access. It's ultra-lightweight, packs down easy, and holds your tackle box snug so it won't budge... until you want it to. Sit back, relax, and let your chair do the organizing.

Rocket Reel: Your Cast-Anywhere Ticket to Dinner

Why pack two handles when one will do it all? Clip in the Rocket Reel kit and watch your Timber Tickler handle transform from a branch-busting saw grip into a fish-wrangling reel holder. One minute you're clearing campfire wood, the next you're pulling dinner out of the creek like a backwoods magician. It still fits the Ridge Runner belt clip system, so you can swap from "Paul Bunyan mode" to "Old Man and the Sea" in seconds flat — no toolbox, no hassle, just pure outdoorsy showmanship.

Tackle Toter: Your Belt-Mounted Bait Boss

Meet the Tackle Toter—the tactical-grade tackle box that does it all. Your Rocket Reel snaps apart and mounts right to the front, making you ready to cast at a moment's notice. It clips onto quick-release belt mounts, fits standard MOLLE webbing like a glove, and connects seamlessly to the Yak Rack or Tack Rack for kayak or camp chair fishing. Use it while strapped to your belt like a true backcountry commando. Available in five models with up to 12 individually covered compartments—because organized chaos is still chaos.

Timber Tickler: One Handle, Endless Possibilities

Meet the Timber Tickler—the ultralight backpacking saw that moonlights as your Rocket Reel handle. Designed for serious weight savers, it breaks down to blade-length size for compact carry. With five scabbard-style sheath options (6", 9", and 12" blades available), it attaches to the same quick-release belt clip as your other RRG gear. The handle snaps to the sheath and locks tight with a clever wedge system—no wiggle, all wow. One handle + multiple blade sheaths = one smart, versatile saw that saves pack space *and* cash

Liability Disclaimer

Ridge Runner Gear assumes no responsibility for any injury, damage, or loss resulting from the use or misuse of the Ridge Rack. Users are responsible for reading and following all instructions provided in this manual. Outdoor adventures involve inherent risks, including but not limited to uneven terrain, weather, gravity, distracted campers, overconfident gear owners, and that one friend who always says, "Watch this." The Ridge Rack holds your gear — not your common sense. Always verify that the clamp is secure, the mounting surface is suitable, and all accessories are properly attached before use. Use the Ridge Rack at your own risk.

90-Day Limited Warranty

Ridge Runner Gear warrants the Ridge Rack to be free from defects in materials and workmanship under normal use for a period of 90 days from the date of purchase. This warranty applies only to the original purchaser and does not cover damage caused by misuse, abuse, modifications, improper maintenance, or normal wear and tear.

If a defect arises during the warranty period, Ridge Runner Gear will, at its discretion, repair or replace the defective part with proof of purchase. To submit a warranty claim, contact us at:

www.ridgerunnergear.net

30-Day Return Policy

If you're not satisfied with your Ridge Rack, you may return it within 30 days of purchase for a refund or exchange. The product may be lightly used for evaluation but must be returned in good condition with all included components. Normal signs of reasonable testing are acceptable, but damaged, abused, modified, or incomplete items may be subject to a reduced refund or may not qualify for a refund. Contact Ridge Runner Gear before returning the product to receive an RMA number and return instructions. Return shipping is the responsibility of the customer unless the item arrived damaged, defective, or incorrect. Original shipping charges are non-refundable unless the return is due to an RRG error or covered defect. To initiate a return or exchange, contact us at:

A Word on 3D Printing

Our gear is proudly 3D printed, which means you may spot layer lines, tiny gaps, or slight weight differences. These are natural traits of the process and do not affect strength or performance. Color tones may also vary from batch to batch. While Ridge Runner Gear is a function over form company, we still care about aesthetics and hold every product to the highest standards possible. In short: it may not look like it came from a spaceship factory, but it'll perform like it belongs on your next adventure.
